
Postgraduate Scholarships

PhD & Masters degree \$30,000 per annum

The Sheep CRC is offering scholarships to PhD and Masters degree candidates for research projects at a choice of sites across the CRC network.

Flexible opportunities are also available for industry-based professionals seeking high level qualifications.

Preference will be given to students intending to enroll at the CRC partner institutions: The University of New England in Armidale, NSW; Murdoch University, WA; The University of Western Australia; Deakin University, VIC; and The University of Tasmania.

Opportunities also exist for projects to collaborate with leading commercial and R&D organisations, including Australian Wool Innovation and Meat & Livestock Australia.

The scholarships will provide a tax-free stipend of \$30,000 per annum for two (Masters) or three (PhD) years.

CRC also offers supplementary stipends to students eligible for other government or private agency scholarships, to achieve a stipend total of \$30,000.

The Sheep CRC is a collaboration between Australia's leading sheep research, education and commercial institutes.

The Sheep CRC portfolio targets both genetic and non-genetic factors affecting wool and meat quality and quantity, as well as integrated management systems, sheep reproduction and parasite control.

Research programs link wool and meat science, microbiology, biochemistry, physiology, growth and nutrition, molecular and quantitative genetics and marketing, adoption and electronic sheep management systems in a framework of sheep industry issues.

**CRC FOR
SHEEP
INDUSTRY
INNOVATION**

Applications are welcome year-round and will be assessed bi-annually in competitive rounds.

For further information
